MOTOMAN MH80 II

Handling & General Applications
with the MH-series

The MOTOMAN MH80 II is a versatile high speed 6-axis robot, providing a high payload of up to 80 kg. It offers superior performance in material handling, machine tending, processing and dispensing applications.

Despite its streamlined body, the MOTOMAN MH80 II features a wide work envelope with a small interference radius. Thereby it can be placed close to machines for loading and unloading of parts, which reduces the required floor space to a minimum.

KEY BENEFITS

- Flexible and powerful (payload of 80 kg)
- High axis speeds
- Improved wrist ratings provide higher handling capacity
- Small interference radius reduces floor space requirements

Allowable wrist load
